

UniQ: The Educational Hub of the Qubic Ecosystem

Official White Paper & Strategic Plan

Concept: Learn. Analyze. Earn.

1. VISION & STRATEGY

UniQ is a "Learn-to-Earn" mobile platform designed to transform passive observers into educated power-users. By gamifying the complex Qubic technology (Oracle, AI, Quorum), we eliminate FUD (Fear, Uncertainty, Doubt) and build a community of "Strong Hands"—investors who hold their positions based on technical conviction rather than speculation.

2. PROGRESSION SYSTEM (GRADES)

The platform rewards merit and knowledge. Users advance through 5 certification tiers:

- * Novice: Basic onboarding and ecosystem discovery.
- * Pathfinder: Intermediate level. Unlocks basic tracking tools.
- * Expert: Challenging exams. Grants access to technical market tools.
- * Legend (Elite): The pinnacle. Maximum rewards and Advanced Macro data.
- * The Burn Mechanism: While entry-level quizzes are free, higher-tier exams require a fee in UNIQ tokens. If a user fails, the fee is burned. This ensures that "Expert" status is rare and valuable.

3. PREMIUM ALPHA TOOLS (SaaS MODEL)

UniQ provides professional-grade intelligence tools via a monthly subscription model. This creates a recurring demand for the token:

- * Qubic Pulse (AI Sentiment): Real-time social mood analysis to predict market trends.
- * Whale & Launch Tracker: Instant alerts on large wallet movements and new project deployments.
- * Safe-Scanner: Contract auditor to detect scams and protect the community.
- * AI Tutor 24/7: A personalized assistant trained on Qubic's technical documentation to help users pass difficult exams.
- * Recurring Burn: 100% of these monthly subscription fees are permanently burned, ensuring constant deflationary pressure.

4. TOKENOMICS (Total Supply: 20,000,000 UNIQ)

- * 75% Community & Education: Distributed via Learn-to-Earn rewards.

- * 15% Team & Development: Locked for long-term innovation.
- * 10% Strategic Reserve: For partnerships and ecosystem growth.
- * Economic Loop: The total supply decreases every time a user pays for an exam, renews a subscription, or fails a certification.

5. AFFILIATION & VIRAL GROWTH

UniQ uses a Mentorship Referral Program:

- * Shared Success: Referrers earn a percentage of the UNIQ their friends earn by passing exams.
- * Organic Expansion: This turns every user into a motivated ambassador, growing the Qubic community at zero external marketing cost.

6. INFLUENCER & KOL STRATEGY (The "Elite Ambassador" Program)

UniQ empowers social leaders to grow the ecosystem through:

- * Verified Status: Exclusive profile badges and leaderboards for high-impact influencers.
- * Revenue Share Boost: Increased referral commissions for creators bringing massive user bases.
- * Social Mining: Direct UNIQ rewards based on social media engagement (views/likes) for educational content.
- * Early Access: Professional tools provided to top creators to help them generate high-quality, data-driven content.

7. FINANCIAL SIMULATION (Example: 1,000 Active Users)

| Metric | Monthly Estimation |

|---|---|

| Tokens Burned (Exams & Fails) | ~100,000 UNIQ |

| Tokens Burned (Subscriptions) | ~36,000 UNIQ |

| Total Annual Burn | ~1,600,000 UNIQ (~8% of Supply) |

| Community Impact | 1,000 Trained "Strong Hands" |

8. SECURITY & ANTI-CHEAT MEASURES

To guarantee the value of our certifications, UniQ implements:

- * Dynamic Question Bank: Tests are generated uniquely for each user.

* Time-Strict Exams: Users have 20 seconds per question to prevent searching for answers online.

* Qubic ID Integration: Prevents multi-accounting and bot farming.
